These jobs are in demand in the state of Minnesota and these are Minnesota median wages. Data collected from Department of Employment and Economic Development.

WHY CHOOSE A CAREER IN HEALTH CARE?

According to DEED's 2020-2030 Employment projections, Minnesota is projected to see an additional 66,144 replacement and net new openings for healthcare practitioners and technical occupations, an increase of 8.1%, while an additional 141,270 replacement and net new openings in healthcare support are projected, an 18.6% increase. In all, openings in the two healthcare categories are projected to make up 14% of the total job openings projected for this time period. Because of this healthy projected growth and large numbers of labor market exits to replace, there are many health care-related occupations that will see a future need, at every education level and are also in high demand according to DEED's Occupations in Demand.
